IATA EDIFACT AND XML CODESET

Version 25.3

September 01st, 2025

Summary

This document provides the agreed codesets utilized by the Airline industry for the identification of information included within IATA standard messages.

The codeset directory is designed to be used by both the EDIFACT as well as the XML messages.

The management of the Codeset is performed by IATA and the Change Management and Integration Group (CMIG) once the requests for new codesets have been approved by the relevant working group.

Identification and assignment of additional codesets is via the CMIG. Updated codesets are reported to the Architecture and Technology Strategy Board for information only.

**Any urgent requirements for new codesets can be submitted to IATA at
aidm@iata.org**

IATA CODE SET DIRECTORY**Legend for Code Set Directory**

- + Signifies new code set or code value.
- * Signifies change of a code set or to a code value.
- ! Signifies change of a description for a code value or note.
- # Code value marked for subsequent deletion
(Note: The code marked for deletion will become inactive at the time it has been marked but remain in the current position for one year.
If this code has been moved from one code set to another, then a reference to the new code set will be given as a note.)

Note 1: An explanatory note can be added to any updated entry.

FAILED TO DELIVER
IN PROGRESS

Service purchased with an associated time limit for consumption and Service was never claimed.

Service having been at least Confirmed is no longer available as the Customer did not claim the Service within a specific time period, as dictated by the Airline.

Service could not be delivered due to Airline's or provider limitations. The Delivery Provider is in the process of delivering the Service. There is a universal concept that the 'In progress' status may block any further financial transactions, e.g., refund.

NOT CLAIMED

Service purchased with an associated time limit for consumption and Service was never claimed.

The Service has not been claimed by the Passenger for reasons as a result of Passenger action or inaction. e.g., Passenger no-show, etc.

READY TO DELIVER
READY TO PROCEED

Provider is in a position to start delivery of the Service. OM is in a position to allow a Delivery Provider to prepare the Service.

Customer is entitled to receive the Service. This is typically a trigger for ORA to begin accounting process

Service was deleted.

REMOVED
REMOVED HOLD VALUE

Airline releases inventory for service and holds values to be reused in further servicing operations.

OM requests the Service from the Inventory owner.

REQUESTED
SUSPENDED

Delivery of the Service is suspended as a result of an Airline decision. Can only revert back to the previous status.

Exception is that Suspended may go to Removed.

This status may be used in case of fraud detection.

UNABLE TO DELIVER

It is not possible for the Delivery Provider to deliver a Service. This could be for reasons of availability, legal or regulatory constraint.
